## Cypress Circle Plasma & Welder

Made by Cypress Welding Equipment, Inc., the CB-1P plasma hole cutter with the CW-5 Series Circle Welder, when equipped with the optional CWO-4530 Carriage which is mounted on a standard monorail, the plasma cutter & the circle welder can move anywhere along the length of pipe.

This fabrication station is designed for single pass or multipass welding of pipe-o-lets, gruv-o-lets, weld-o-lets or nozzles using MIG or Flux cored wires, with or without gas shielding. These machines are capable of holes & welds 1-1/2" - 12" diameters.

The approximate time to cut the hole is 6 - 10 seconds depending on the diameter. The approximate time for a single pass weld is 15 - 30 seconds.
