

Osland Piping Supply

Stackable Pipe Carts

The stackable pipe cart design can be effective tool which mechanical contractors are using both in a fabrication shop and jobsite environment.

- Load capacity of 4,000 lbs per cart
- Stackable design - 6 high in storage, 2-3 high max when shipping
- Designed to use standard 4x4 lumber dunnage to keep wheels off surface when shipping via truck

The standard cart is a six wheel design; 4 wheels with swivels, and is approximately 34" wide, 69" long, and 34" tall. It is constructed using 2" tubular mild steel with 6" steel wheels.

For more information on these or other carts designs, please contact us.
